Profile Summary

Applied Informatics student at DSW IDEIS (WSEI), Kraków, with full legal right to work in Poland. Coursework and projects in data structures and algorithms, Java, JavaScript and C#. Hands-on Linux and server reliability experience from running a live multiplayer server, plus web application development with SQL/Supabase. Seeking an internship or part-time junior role in software development in Poland, where I can apply my coursework and self-taught engineering skills to real-world systems. Available part-time (15–20 hours per week), starting immediately.

Education

DSW IDEIS (WSEI) Kraków, Poland
B.Eng. in Applied Informatics – in progress, expected graduation 2029 *Oct 2025 – Present*
- Now in 2nd year; coursework includes data structures & algorithms, C#, SQL databases, operating systems, network fundamentals.

Skills

Languages: Java, JavaScript, C# / .NET, SQL, HTML5, CSS3
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Software Testing & Debugging
Systems & Infrastructure: Linux administration, server reliability, configuration management, log analysis & troubleshooting, access/permission control
Web & Data: Web application development, Supabase, SQL, technical SEO (sitemap.xml, robots.txt), Google Analytics
Tools: Git, GitHub, VS Code, Visual Studio, SSMS, IntelliJ IDEA
AI & Data Quality: Prompt engineering (ChatGPT, Claude, Gemini), data annotation & QA, Ukrainian (native) and Polish (B2) language expertise

Experience & Technical Projects

AI Data Annotation Specialist Remote
TSMG Holding – Freelance *Aug 2026 – Present*
- Transcribe and annotate Ukrainian and Polish audio data for LLM and ASR training, with precise time-stamping and speaker identification; perform QA against project guidelines.

Afterlight Server Infrastructure – Owner & Administrator Personal Project
Infrastructure Administration, Site Reliability & First-line Tech Support *Oct 2025 – May 2026*
- Owned end-to-end reliability of a live multiplayer server on **Linux**: configured the infrastructure and monitored uptime.
- Resolved access and permission issues by adjusting permission rules for players and staff.
- Acted as sole point of contact for technical support; analyzed system logs to diagnose runtime errors and software conflicts.

Web Development Projects Personal Projects
HTML, CSS, JavaScript, SQL / Supabase, SEO, Google Analytics *Jun 2025 – Present*
- **AfterMarkt**: online data-tracking web application built with AI-assisted development, with a **Supabase** cloud database backend, deployed on GitHub Pages.
- **Tense Master**: public website with **SEO** (sitemap.xml, robots.txt) and **Google Analytics** tracking.
- Independently debug deployment errors and verify software dependencies to keep the sites running.

Minecraft Open-Source Development – Modrinth Personal Project
Java, Object-Oriented Programming, Software Testing, Client-Server Architecture *Sep 2024 – Present*
- Publish standalone Java mods on Modrinth: 8 projects with **7,000**+ downloads in total.
- Develop with AI-assisted workflows; review, debug and manually adjust generated code (e.g. model geometry) to fix issues.
- Handle version management and bug tracking: reproduce reported issues, fix them and release updates.

Languages & Certifications

English: B2 (Upper-Intermediate) – CEFR Certificate, International House
Polish: B2 – Certyfikat Znajomości Języka Polskiego, Państwowa Komisja
Certifications: C# Foundation Certificate – freeCodeCamp, in partnership with Microsoft Learn; API Beginner – Postman; Generative AI Fundamentals – Databricks; Data Annotation & Quality Assurance – TSMG Holding; Project Lyra: AI Prompt & Response Evaluation – Welo Data
